

RETR MASTERCLASS USER FLOW

DOCUMENTATION

End-to-End Executive Experience & Financial Consultation Engine

1. EXECUTIVE SUMMARY & PHILOSOPHY

Retr (Akshay Vriddhi) is designed as a high-fidelity, institutional private wealth and retirement advisory platform. The core user experience rejects aggressive sales funnels, popup clutter, and dark patterns in favor of a calm, authoritative, decision-first architecture.

Core Architecture Principles

- Privacy-First Calculation:** 100% of financial readiness, SWP depletion, and goal math executes client-side without demanding user signup or storing personal financial data.
- No Product-First Pushing:** Initial consultations and interactive decision frameworks discuss real household cash flows and risk constraints without naming proprietary commercial products.
- Institutional Trust & Multi-Insurer Breadth:** Advisory backed by choice across 6 empanelled life insurers and major asset management companies.
- Structured Conversion Journey:** Unobtrusive progression from landing discovery to decision calculators to diagnostic quiz to private callback request to executive CRM pipeline.

2. USER PERSONA PROFILES

PERSONA SEGMENT	AGE / HORIZON	CORE FINANCIAL CONCERN	PRIMARY PLATFORM ENTRY POINT
Pre-Retiree Executive	50 – 58 yrs (2–5 yrs away)	Corpus gap estimation, post-retirement cash flow continuity & tax-efficient SWP.	/calculators/retirement-readiness
Early Wealth Accumulator	38 – 48 yrs (10+ yrs away)	Compounding targets, child higher education inflation, EPF/NPS allocation.	/calculators/education-goal & NPS tools
Post-Retirement Household	60 – 72 yrs (In retirement)	Capital preservation, health cover inflation, estate & nomination audit.	/services#services & /preparedness-check

3. END-TO-END USER JOURNEY STAGES

01

Stage 1: Cinematic Entry & Discovery (Landing Page)

The user lands on the home section. High-contrast wine & gold accents frame the value proposition with immediate clarity.

- **Hero Display:** Executive badge pill, glowing gold headline ("*Retire without asking anyone for money.*"), topic quick tracks (Corpus Gap, SWP vs Annuity, Family Vault).
- **Institutional Credentials Bar (TrustBar):** 20+ years leadership metric, empanelled insurers, 100% fee schedule transparency.
- **Decision Frameworks (Situation Grid):** Interactive cards targeting *Target Corpus*, *Capital Drawdown*, and *Future Milestones*.
- **Leadership Teaser:** Co-founder background (Shiv Maheshwari & Vikram Rajput) establishing institutional authority.

02

Stage 2: Self-Service Financial Intelligence (Calculators)

The user accesses 9 decision-first calculators. No sign-up barriers exist.

- **Retirement Readiness Score Engine:** Input monthly expense target, current corpus, inflation rate, and expected return. Instant readiness score (0–100) generated with corpus gap calculation.
- **Drawdown & SWP Simulator:** Models year-by-year capital depletion against bad opening decade market scenarios.
- **EPF / NPS / Goal Optimizers:** Tax deduction checks under Old vs New tax regimes.

03

Stage 3: Interactive Diagnostic Quiz (Preparedness Check)

A 7-question diagnostic quiz evaluating retirement readiness across cash flow, medical cover, tax, and estate protection.

- Interactive cards score each pillar (0 to 100%).
- Generates a personalized Readiness Summary Breakdown.
- Direct CTA button: "*Discuss this result in a 20-minute call*".

Stage 4: Private Consultation Booking (Callback Popup)

Clicking any "Request a call" CTA triggers a clean, glassmorphic modal overlay.

- **User Inputs:** Full Name, Mobile Phone (10-digit validation), Preferred Time Slot (Morning / Afternoon / Evening), Specific Financial Question.
- **Submission Handling:** Client sends `POST /api/leads` payload. Displays immediate toast confirmation with no page redirect.

Stage 5: Executive CRM Pipeline & Lead Dispatch (Admin Portal)

Advisors receive incoming leads in real-time within the secure administrative portal.

Lead Management Workflow

- **Authentication:** Secure session validation via administrative login portal.
- **Pipeline Statuses:** `NEW` → `CONTACTED` → `SCHEDULED` → `COMPLETED`
- **Adviser Actions:** Add consultation notes, update engagement stage, review calculator parameters supplied during lead generation.

4. SYSTEM ARCHITECTURE & SECURITY SPECIFICATIONS

Component Layer	Technology Stack	Security & Operational Rules
Frontend UI	React 19 + Vite + React Router v7 + Custom CSS Token System	Zero tracking scripts, strict client-side calculation execution, responsive dark glassmorphism.
API Backend	Node.js Express REST API (<code>server/src/index.js</code>)	Parametrized query protection, CORS enforcement, input sanitization on all lead endpoints.
Database	<code>better-sqlite3</code> embedded database (<code>retr.db</code>)	ACID compliant storage for leads, administrative credentials, and site content overrides.
Regulatory Compliance	IRDAI & AMFI Disclosure Protocols	Embedded disclosures in footer grid, clear disclaimer on illustrative scenario models.
